Sankara Narayanan Paramasivam

Google Cloud Certified Professional Cloud Architect · Technical Lead · Full Stack Developer

Louisville, Kentucky, USA sankaranarayanan097@gmail.com
linkedin.com/in/sankara-narayanan-paramasivam-00a00a11a sankar-dev.github.io

PROFESSIONAL SUMMARY

- 12+ years across the full software development life cycle; 6+ years in the **banking domain** building and maintaining real-time and P2P payment systems.
- **Google Cloud Certified Professional Cloud Architect**: architecture, secure design and migration of banking workloads to GCP.
- Technical lead of development and QA teams in **Agile Scrum**: sprint planning, code reviews, client coordination and financial-institution onboarding.
- CI/CD release pipelines in **Azure DevOps, GCP and AWS**; Kubernetes (GKE) deployments, services and volumes in YAML with Docker containers; Ansible automation.
- **SSO with OAuth 2.0 and OpenID Connect** for banking applications; secure design, IAM and OWASP practices.
- Full stack with **Node.js (hapi.js, Express), React, Next.js, Angular and TypeScript**; REST, GraphQL and SOAP APIs; Electron desktop apps.
- Data and operations: **MSSQL, Redis Cluster, PostgreSQL, MySQL, MongoDB**, DbUp migrations, RabbitMQ, Nginx and Datadog observability.
- AWS serverless and hosting: Amplify, AppSync, Lambda, DynamoDB, S3, EC2, Route 53, Elastic Beanstalk and CloudFront.

TECHNICAL SKILLS

Cloud	Google Cloud (GKE, Cloud Run, Cloud Functions, Cloud Storage, IAM, Firebase), AWS (EC2, S3, Lambda, Amplify, AppSync, DynamoDB, Route 53, Elastic Beanstalk, CloudFront), Azure
Languages	JavaScript, TypeScript, Node.js, PHP, HTML5, CSS, YAML
Front end	React, Next.js, React Native, Angular, Angular Material, jQuery, Electron
Back end & APIs	hapi.js, Express.js, REST, GraphQL, SOAP, RabbitMQ, WSO2 API Gateway, Swagger / OpenAPI, Yii, WordPress, Magento
Data	MSSQL, Redis Cluster, MySQL, PostgreSQL, MongoDB, DynamoDB, DbUp
DevOps	Kubernetes, Docker, Ansible, Terraform, Azure DevOps, CI/CD, Nginx, Datadog, Git, GitHub, SVN, trunk-based development
Security	OAuth 2.0, OpenID Connect, SSO, JWT, role-based access, IAM, OWASP Top 10, secure SDLC
Practices	Agile Scrum, technical leadership, code review, requirements analysis, end-to-end testing (Jest)

CERTIFICATIONS

Professional Cloud Architect — Google Cloud · Sep 2026 – Sep 2028 · Verify on Credly

- **6 Google Cloud skill badges**: Cloud Security Fundamentals, Build a Secure Cloud Network, Manage Kubernetes, Load Balancing on Compute Engine (2026); Deploy Kubernetes Applications, Serverless Apps on Cloud Run (2024)
- **9 Google Cloud courses**: Kubernetes, Cloud Run, Cloud Functions, Firebase, Gemini, containers, service orchestration, core infrastructure (2024)
- **Secure development (LinkedIn Learning)**: CSSLP Secure Software Concepts, Secure Coding, OWASP Top 10, Web Security, Developing Secure Software, E2E Testing with Jest (2022–2023); **Angular & Node.js MEAN Stack** (Udemy)

EDUCATION

B.Tech, Information Technology · Anjalai Ammal Mahalingam Engineering College, Anna University 2007 – 2011

PROFESSIONAL EXPERIENCE

Aspire Systems · System Analyst / Technical Lead (Mar 2023 – Present, United States) · Module Lead (May 2020 – Mar 2023, Chennai)

Instant Money Transfer Application · U.S. banking client (confidential) — Oct 2020 – Present

Building and maintaining an application that brings real-time and P2P payments into banking applications.

- Technical lead owning architecture and secure design; lead the development and QA teams to deliver sprint goals on time.
- Code reviews, best practices, sprint planning, and hands-on development in Node.js (hapi.js) and React.
- Migration to Google Cloud (GCP): containerized with Docker, orchestrated on Kubernetes, automated with Ansible.
- Implemented SSO with OAuth 2.0 and OpenID Connect; Redis Cluster for distributed data and caching; DbUp database migrations.
- Built continuous delivery pipelines in Azure DevOps; support deployments, environment configuration and production with onsite/offshore TechOps.
- Monitoring and observability with Datadog; Nginx, RabbitMQ and WSO2 API gateway in the platform.
- Work with the product team and Scrum master on deliverables; lead client coordination and financial-institution onboarding.

Serverless React Application · proof of concept — Aug 2020 – Sep 2020

- React app on an AWS AppSync GraphQL API; S3 file storage; admin API with Lambda; offline mode with Amplify DataStore; CI/CD with Amplify.

AWS Amplify, AppSync, GraphQL, DynamoDB, Lambda, S3, React, Node.js

Banking Solutions for Lending Platforms — Jun 2020 – Aug 2020

- React developer on lending and loan-management platforms; role-based authorization, client modules, bug fixing and troubleshooting.

React, JavaScript, Node.js, Nginx

Senior Analyst · Excelacom Technologies, Chennai — Sep 2017 – Apr 2020

Software Developer · Encore IT Services Solutions, Chennai — Sep 2015 – Sep 2017

Projects across these roles:

sKiosk App · Windows desktop app · 1 year · Senior developer

- Electron app that downloads content from an internal Node.js server and plays it locally on school kiosks to cut internet costs; auto-update releases.
- Content sync to all kiosks with AWS CLI and S3; managed EC2 instances, IAM users and S3 buckets; application design and feature changes.

Electron, Node.js, Angular, WordPress, PHP, AWS, Nginx

Vote System · 5 months

- RESTful services, reporting and an admin panel for kiosk survey campaigns; Chart.js dashboard; JWT authentication; Dockerized the Node.js and Angular apps.

Express.js, Node.js, MongoDB, Angular, Docker, AWS

ServiceNow Dashboard · 6 months

- Customized ServiceNow ticket dashboards: chart web services, Angular Material screens, Chart.js integration, deployment and server configuration.

Angular, Angular Material, Express.js, Node.js, Chart.js, AWS, Apache

Our Campus App · 6 months · Senior developer

- Admin dashboard and product site for a school products portal; Magento extension for the content workflow; REST endpoints from Magento to WordPress; React Native bug fixes.

WordPress, Magento, React Native, AWS

School Content Upload · 6 months

- WordPress plugins for the school content workflow, cron jobs for automatic posting, theme development and campaign activities.

WordPress, PHP, Bootstrap, jQuery, AWS

Web Developer · Freelance, Chennai — Jan 2014 – Sep 2015
